Developed countries have been attempting to alleviate poverty in the world's poorest countries for decades by donating large sums of money to their governments. The money is intended to stimulate the economies of underdeveloped nations and to build up infrastructure such as schools and hospitals. Unfortunately, this money often ended up being used ineffectively or stolen by corrupt officials. Another problem is that poorer countries sometimes become dependent on the donated money. Consequently, a number of experts argue that, in the long run, providing foreign aid doesn't really help underdeveloped countries. Those who believe in foreign aid, on the other hand, argue the fund must just be more carefully monitored to ensure they are used effectively.

- ① The reason why foreign aid is not helpful for underdeveloped countries is that the donated money is strictly monitored by their governments.
- ② Nobody doubted that the donated money by developed countries was effectively used to build up infrastructure in underdeveloped countries.
- ③ The donated money by developed countries was all stolen by corrupt officials of underdeveloped countries.
- ④ Foreign aid has encouraged underdeveloped countries to become independent of developed countries.
- ⑤ The donated money by developed countries was not always effectively used in underdeveloped countries.

Do the words we use affect our thoughts and actions? The answer may lie in a remote part of northeastern Australia.

(A) According to Boroditsky, Kuuk Thaayorre, the language of the Cape York Australian aboriginals, relies exclusively on absolute directional references, unlike English. Like English, Kuuk Thaayorre has words for "north," "south," and so on. Unlike English, Kuuk Thaayorre lacks words for relative directional references, such as "left" and "right."

(B) For long distances, an English speaker might say, "Chicago is north of there." But for short distances, the same speaker will shift to a relative reference and might say, "My brother is sitting to my right." In contrast, a speaker of Kuuk Thaayorre always uses absolute directional references, saying things like "My friend is sitting southeast of me."

(C) Cognitive psychologist Lera Boroditsky has reported that aboriginal children from Cape York can accurately point to any compass direction as early as age 5. In contrast, most Americans cannot do this even as adults. But why?

It's not that funny when more important issues are involved, such as choosing the best medicine or medical procedure.

In one study, consumers were given an option to purchase jam. Half of them could choose from 6 different flavors, and the other half had 24 flavors to choose from. ① Although consumers with more choice expressed more interest, they were actually 10 times less likely to purchase any jam. ② Similarly, restaurants with menus that feature a broader variety of choices often find that patrons are more likely to order from a smaller number of familiar choices. ③ Apparently, businesses that increase the variety of their product offerings are not guaranteed increased sales. ④ It may be faintly amusing that people have trouble exercising choice in a coffee shop, grocery store, or restaurant. ⑤ Imagine, for example, facing too many options when deciding whether to remove a seriously ill infant from life support.

19. 다음 밑줄 친 부분에 들어갈 가장 적절한 표현은?

The opening five minutes offer us a rich opportunity to capture the attention of students and prepare them for learning. They walk into our classes trailing all of the distractions of their complex lives—the many wonders of their smartphones, the arguments with roommates, the question of what to have for lunch. Their bodies may be stuck in a room with us for the required time period, but their minds may be somewhere else entirely. It seems clear, then, that we should start class with a deliberate effort to _____. Unfortunately, based on my many observations of faculty members in action, the first five minutes of a college class often get frittered away with logistical tasks (taking attendance or setting up our technology), gathering our thoughts as we discuss homework or upcoming tests, or writing on the board.

- ① bring students' focus to the subject at hand
- ② explain to students the importance of learning
- ③ make students understand how to avoid distractions
- ④ prepare ourselves for all the necessary works for class
- ⑤ persuade students to pursue learning outside the classroom

20. 다음 밑줄 친 부분에 들어갈 가장 적절한 표현은?

Pictures are by their very nature a more accessible medium of communication than (specialists') language, more open to interpretation than the written word. Science images, therefore, can have a considerable impact on broader audiences and can be turned into powerful tools of persuasion. Hence, the intrinsic function of images in the science as a means of knowledge production needs to be complemented by looking at their function as media in public discourse. Their impact on a broader public has led Nikolow and Bluma to call for a combination of the history of visualization with the history of popularization of science; that is, an extension of the history of visualizations to include _____. Thus, we suggest including another category, namely, images of science and scientists created outside science and communicated in public discourse.

- ① the way that the public change sciences
- ② the history of public perceptions of the sciences
- ③ the history of the development of scientific arts
- ④ the history of arts' contribution to scientific discourses
- ⑤ the way that sciences correct the public's misconceptions
