- 10. The task of winning an election in modern times is assigned to political dignitaries, advertising experts, strategy consultants, personal aides, and an array of volunteers forming a conglomerate of professions, strictly regulated by campaign rules. But ancient politicians were more skilled than modern ones at exploiting loopholes in election law. In Rome, the key loophole lay in the fuzzy distinction between electoral bribery and mere generosity. Roman elections were often won on the strength of free food, drinks, entertainment, and sometimes hard cash offered directly to voters and financed by private fortunes. Most of the Roman elite relied on the gentleman's agreement that the line between bribery and generosity would not be strictly

Jeff Woolf has been involved in a serious crash-one that might have killed him were it not for his helmet. So why, he wondered, do so many of his contemporaries refuse to wear one? It's mostly because they're hard to carry around; they're thick and bulky, and don't fit into bags or backpacks. And that was a problem that Woolf, an engineer, knew he could fix. The result is: Morpher, a bike helmet made from interweaved plastics that is just as strong as its traditional counterparts, but flexible enough to fold almost totally flat, making it easier to transport. Woolf recently shipped the first units to his Indiegogo backers, who helped raise almost \$300,000. He's now in talks with other stores too. "It's inevitable that as more people take to the road on a bicycle, more people will have accidents," Woolf says, adding that he hopes Morpher will save lives.

Both explanations have been used for evidence of conformity in psychological experiments.

The bandwagon effect is a phenomenon whereby the rate of uptake of beliefs, ideas, fads and trends increases the more that they have already been adopted by others. (①) In other words, the bandwagon effect is characterized by the probability of individual adoption increasing with respect to the proportion who have already done so. (②) As more people come to believe in something, others also "hop on the bandwagon" regardless of the underlying evidence. (③) The tendency to follow the actions or beliefs of others can occur because individuals directly prefer to conform, or because individuals derive information from others. (④) For example, social pressure has been used to explain Asch's conformity experiments, and information has been used to explain Sherif's autokinetic experiment.

Ultimately, concept cars are merely another branch of fashion—one year it's huge wheels while the next it's rear doors.

Mankind has always wanted to look into the future—and, where possible, to create it, too. (①) After all, isn't it so much more exciting to go somewhere that nobody has ever been? Or do something no one else has ever done? (②) It's only by pushing the boundaries that advances can be made with new designs, new technologies, and new materials. (③) Whether it's clothes, household appliances, or cars, there are always advances to be made, and fashions constantly change, too. (④) However, there's one thing that does not change: the importance of the concept car.

Interpretations of Guernica vary widely and contradict one another. This extends, for example, to the mural's two dominant elements: the bull and the horse. Art historian Patricia Failing said, "The bull and the horse are important characters in Spanish culture. Picasso himself certainly used these characters to play many different roles over time. This has made the task of interpreting the specific meaning of the bull and the horse very tough. Their relationship is a kind of ballet that was conceived in a variety of ways throughout Picasso's career."

When pressed to explain the elements in Guernica, Picasso said, "...this bull is a bull and this horse is a horse... If you give a meaning to certain things in my paintings it may be very true, but it is not my idea to give this meaning. What ideas and conclusions you have got I obtained too, but instinctively, unconsciously. I make the painting for the painting. I paint the objects for ______."

French vocabulary influenced Middle English so markedly after the Norman Conquest in 1066 that it is easy to ignore the fact that French loan words can be found in Old English too.

- Whatever the political consequences of these events, the linguistic consequences were a handful of French loan words, among them 'serve', 'bacon', and 'castle'.
- © Indeed, it would be surprising if there had been no such influence, given the close contacts which had grown up in the 10th and 11th centuries. The monastic revival, in particular, had started in France, and many English monks must have studied there.
- © Above all, there was close contact between the two cultures following the exile to Normandy of Edward the Confessor, the son of Æthelred II and Emma, daughter of the Duke of Normandy. Edward lived there for 25 years, returning to England in 1041 with many French courtiers. When he succeeded to the throne, several of the French nobles were given high positions a source of considerable grievance among their Anglo-Saxon counterparts.

Political Correctness(PC) is a term used to describe language, ideas, policies, or behavior seen as seeking to minimize offense to gender, racial, cultural, disabled, aged or other identity groups. Some critics of political correctness argue that it is a form of coercion rooted in the assumption that in a political context, power refers to the dominion of some men over others, or the human control of human life; by this argument, ultimately, it means force or compulsion. This argument holds that political correctness in this context is subjective, and corresponds to the sponsored view of the government, minority, or special interest group that these conservative critics oppose. They claim that by silencing contradiction, their opponents entrench their views as orthodox, and eventually cause it to be accepted as true, as freedom of thought requires the ability to choose between more than one viewpoint. Another criticism is that enforcers rarely consult the minorities they claim to be protecting, and controversies are therefore based on assumptions that the minorities want this, when this is often not the case. Some people have accused the enforcers of supporting the stereotypes themselves. Some websites have branded political correctness completely intolerant of any person who does not act in a politically correct . Some critics nickname fashion. enforcers the "PC brigade" or the "diversity dictators."
