Prospective studies of lifetimes have often shown that some theories of alcoholism were incorrect because they confused cause with _____. For example, on the basis of current evidence, alcoholism is seen to be associated with but not caused by growing up in a household with alcoholic parents. Likewise, alcoholism is associated with but not usually caused (in men, at least) by depression, and alcoholism is associated with but not caused by self-indulgence, poverty, or neglect in childhood. Rather, alcoholism in individuals often leads to depression and anxiety; indeed, self-medication with alcohol makes depression worse, not better.

- ① evidence
- ② alcoholism
- ③ depression
- ④ association
- ⑤ self-medication

The American Founders preferred the term “republic” to “democracy” because it described a system they generally preferred: the interests of the peoples were represented by more knowledgeable or wealthier citizens who were responsible to those that elected them. Today we tend to use the terms “republic” and “democracy” interchangeably. A widespread criticism of representative democracy is that the representatives become the “elites” that seldom consult ordinary citizens, so even though they are elected, a truly _____ government doesn’t really exist.

- ① sincere
- ② responsible
- ③ universal
- ④ representative
- ⑤ perpetual

This new fad is actually very old; for hundreds of years in India, a woman’s friends have painted her to celebrate her wedding day.

A popular fad for many teenagers is tattooing. ① Parents are usually horrified by these permanent designs on their children’s skin, but the young people see them as a fashion statement. ② In the new millennium, some parents are greatly relieved when their teenage children turn to a new fad, a temporary form of decorating the hands, feet, neck, or legs—a method of painting beautiful designs that last only about three weeks. ③ Another fad from India, however, causes parents more worry—*bidis*. Children and young teens are attracted to these thin cigarettes in candy flavors such as orange, chocolate, mango, and raspberry. The problem? *Bidis* contain more nicotine than regular cigarettes. ④ Unfortunately, many children think these are “cool”—fashionable. ⑤ So until a new fad comes along, “Indian style is hot,” as one radio commentator observed.

We need to think harder about narrowing the gap between those at the bottom and the top. If most people, especially lower-income individuals and minorities, keep the bulk of their wealth in housing, we should rethink lending practices and allow for a broader range of credit metrics (which tend to be biased toward whites) and lower down payments for good borrowers. Rethinking our retirement policies is crucial too. Retirement incentives work mainly for whites and the rich. Minority and poor households are less likely to have access to workplace retirement plans, in part because many work in less formal sectors like restaurants and child care. Another overdue fix: we should expand Social Security by lifting the cap on payroll taxes so the rich can contribute the same share of their income as everyone else. Doing _____ (A) _____ would be a good first step. But going forward, economic and racial fairness can no longer be thought of as _____ (B) _____ issues.

Not all people ① who have heart attacks have the same symptoms or have the same severity of symptoms. Some people have mild pain; ② others have more severe pain. Some people have no symptoms. For others, the first sign may be sudden cardiac arrest. However, the more signs and symptoms you have, ③ the great the chance you are having a heart attack. Some heart attacks strike suddenly, but many people have warning signs and symptoms hours, days or weeks in advance. ④ The earliest warning might be recurrent chest pain or pressure (angina) ⑤ triggered by activity and relieved by rest. Angina is caused by a temporary decrease in blood flow to the heart.

- ④ preservation
- ⑤ mitigation

14. 다음 글에서 제시하는 ‘정직하지 못한 이메일’의 특징으로 옳지 않은 것은?

A team at Cornell University in New York has developed software aimed at detecting lies in emails and text messages. Traditional lie detectors work by measuring a person's heartbeat. They rely on the fact that a person's pulse gets faster when they are nervous or stressed—a strong indicator that they are not telling the truth. The new software is much more subtle. It scans electronic messages and looks for various clues which indicate lies are being told. Researchers have identified a number of these clues, or ‘falsehood indicators’, ranging from overuse of the third person to frequent use of negative adjectives and verbs. A team of volunteers provided the researchers with both truthful and dishonest emails. By comparing them they came across a number of characteristics. They noticed, for instance, that truthful emails were usually short and written in the first person, with lots of use of ‘I’ to start sentences. Dishonest emails were on average 28 percent longer than honest ones because people worry about not sounding convincing, so tend to give more detail when lying. And because liars want people to fall for their stories, they tend to use more sense verbs such as ‘see’ and ‘feel’, perhaps in an attempt to gain the reader's sympathy.

Gorkha was a sitting target. Most of the houses in this mountainous district northwest of Nepal's capital, Kathmandu, were made of little more than stone or bricks bonded together with mud. ① That meant they were easily destroyed when tremors from a 7.8-magnitude earthquake rippled across the country just before noon on April 25, killing more than 8,000 people. ② By May 5, when TIME photographer James Nachtwey arrived in the remote village of Barpak, in the northern part of Gorkha, near the epicenter of the quake, "there wasn't much left" standing, he says. ③ The tremors "basically shook the structures apart," leaving irregular piles of stone and twisted wooden frames where there were once homes. ④ How do you rebuild when the ground beneath your feet could shift at any moment? ⑤ Worst of all, there was more to come. After Nachtwey left Nepal, as relief and rescue teams finally spread out across the impoverished Himalayan nation, there was a second seismic blow. On May 12, a 7.3-magnitude quake erupted at the eastern end of the same section of the geological fault that had caused the earlier temblor.

Throughout Earth's history, several extinction events have taken place. The largest one happened about 250 million years ago and is called the Great Dying. Scientists theorize that a single devastating event killed off most life-forms on Earth. It could have been a series of large asteroid strikes, a massive emission from the seafloor of the greenhouse gas methane, or increased volcanic activity, such as the eruptions that created the Siberian Traps that now cover some 770,000 square miles of Russia. When the mass extinction ended, 57 percent of all animal families and 83 percent of all genera had disappeared from the planet, and it took some 10 million years for life to recover.

Reports of the demise of the world's most popular reserve currency were greatly exaggerated.

- (A) But here we are, six years after the crisis, and the dollar is showing just how almighty it actually is. The dollar index, which measures its value against other currencies, recently reached a four-year high. And the policymakers who bitterly criticized the dollar show little real interest in dumping it. The amount of U.S. Treasury securities held by China, for instance, stands at \$1.27 trillion, 75% more than in 2008.
- (B) Ever since the 2008 - 09 financial crisis, predictions of the dollar's demise have come hand over fist. As the U.S. economy sank into recession, so too did confidence that the greenback could maintain its long-held position as the world's premier reserve currency.
- (C) In Beijing, Moscow and elsewhere, policymakers railed against the dollar-dominated global financial system as detrimental to world stability and vowed to find a replacement. Central bankers in the emerging world complained that the primacy of the dollar allowed American economic activity to send shock waves through the global economy, roiling their own markets and currencies.
