What do you think a person can do in forty-three seconds? For another entry in Guinness, Katz produced 103 paintings in twelve straight hours of painting. It has been calculated that Katz paints at the rate of 2.65 square feet a minute! The only slow thing about a Katz painting is how long it takes to dry. In addition to being the world's fastest painter, Katz is also the most highly productive. But I will do none of these things, though I am in peril of losing my life. I too have children, but nevertheless I shall not bring any of them into court to beg the judge to set me free. This is not because I am stubborn, but because it's disgraceful for respected people to act in such a manner. Apart from the question of reputation, I think it is not right to implore the judge or to seek innocence by begging; we ought rather to inform the judge and convince him. Orlando, which was a quiet farming town a little more than thirty years ago, has more people passing through it today than any other place in the state of Florida. The reason, of course, is Walt Disney World, Universal Studios, Sea World and a host of other theme attractions. These theme parks pull more than twenty-five million people a year to what was until fairly recently an empty area of land. Few of these people visit the actual city of Orlando. Instead, they prefer to stay in one of the motels and hotels fifteen miles to the south along Highway 19. Despite enormous expansion over the last decade, the city itself remains free of the commercialism. However, the city itself has not been able to escape the traffic congestion and other problems associated with the visit of so many millions of tourists as well as the thousands of people who work in the tourist industry. Without a doubt, tourism has certainly changed life for the residents of Orlando and the surrounding area.

The diet of many British people is quite different to that of their parents and has often changed in their own lifetime. Those who lived during the Second World War can remember when there was not a lot of food to choose from. Fruit like bananas and oranges were very difficult to find, and each person could have only fifty grams of butter and sugar each week. Today we have many more fruits and other foods to choose from and new ways to cook them, like microwave ovens. But we have less time for shopping and cooking. People used to walk to their nearest shops almost every day. They went to the baker's for bread, the butcher's for meat, the greengrocer's for fruit and vegetables and so on.
