To demonstrate that you are thankful, you should say “thank you” immediately when you walk into the room and do the interview. This is a step that many people forego and do not remember, but when you do it, you demonstrate a level that is above the average candidate. So, you should say something to the interviewer like the following: “Thank you for inviting me to have this interview. I appreciate the time that you have committed to talk to me about this available position.” You don’t have to fluff up your words or try to make it into something fancy. Instead, keep it simple and to the point to show your gratitude to the interviewer.

It’s drilled into us that we need to be more active to lose weight. So it spins the mind to hear that a key to staying thin is to spend more time doing the most sedentary inactivity humanly possible. Yet this is exactly what scientists are finding. In light of Van Cauter’s discoveries, sleep scientists have performed a flurry of analyses on large datasets of children. All the studies point in the same direction: on average, children who sleep less are fatter than children who sleep more. This isn’t just in America — scholars all around the world are considering it because children everywhere are both getting fatter and getting less sleep.

Egg yolks range dramatically in color, but yolk variations are caused by dietary differences rather than genetic ones. Yolk color is ① influenced primarily by the pigments in the chicken feed. If the hen gets plenty of yellow-orange plant pigments known as xanthophylls, the pigments will be deposited in the yolk. Hens receiving mash with yellow corn and alfalfa meal will ② lay eggs with medium yellow yolks. Those fed on wheat or barley produce lighter yolks. A totally colorless diet, such as white corn, will yield a ③ colorful yolk. For cosmetic reasons alone, farmers avoid giving chickens a colorless diet, because consumers ④ prefer a yellowish hue to their yolks.

For most adults, the ability to drive a car is an integral part of our sense of empowerment and freedom. We ① seldom think of what it would be like if we couldn’t just “jump in the car and go.” But that feeling of complete freedom to go where you want and when you want is such a deep part of how we all function that it seems inconceivable to any of us to ② lose that mobility and freedom. But for senior citizens, there will come a time when they will need to stop driving. The causes are many, but the most common reason that calls for senior citizens to stop driving is ③ enhanced eyesight. While much can be done to preserve the eyesight of senior citizens, if their ability to see becomes a hazard behind the wheel, they will have to be told that it’s time to let that ④ precious freedom go.

There are hundreds of gas stations around San Francisco in the California Bay Area. One might think that gas stations would spread out to serve local neighborhoods.

- (A) The phenomenon is partly due to population clustering. Gas stations will be more common where demand is high, like in a city, rather than in sparsely populated areas like cornfields.
- (B) But this idea is contradicted by a common observation. Whenever you visit a gas station, there is almost always another in the vicinity, often just across the street. In general, gas stations are highly clustered.
- (C) Moreover, there are many factors at play. Locating a gas station is an optimization problem involving demand, real estate prices, estimates of population growth, and supply considerations such as the ease of refueling.

A way of testing a fire safety management plan in a building, fire drills are considered training exercises for all involved. Everyone in a building must comply with ① them, including staff, students, and visitors. ② They help building users learn and remember alternative escape routes and allow fire wardens to practice their evacuation role. Shortcomings in fire drills can be identified and rectified. ③ They are planned events, but advance warning should not normally be given to building users. This ensures ④ they react normally when the fire alarm sounds and are not unnaturally prepared. False fire alarm activations and evacuations do not count as fire drills as they are unplanned.

Gregory Bare, a Bloomington firefighter, was at home getting ready to go to bed when he noticed his neighbor's house was on fire. Even though ① he was off duty and did not have access to his protective clothing or equipment, Bare leaped into action. After reporting the fire to 911 operators, he ran over to find his neighbor struggling to get out of her window. Removing the screen and helping her escape, ② he learned that an additional resident remained inside. With the front of the home burning, Bare entered through the rear where there was no smoke or fire, woke up the sleeping housemate, and escorted ③ him out of the home to safety. Several firefighters called to the scene credited Bare with saving the two residents. After review, ④ his action will likely be recognized at the Bloomington Fire Department's annual awards banquet.

18. Hansberry에 관한 다음 글의 내용과 일치하지 않는 것은?

Hansberry was born on May 19, 1930, in Chicago, Illinois. She wrote *The Crystal Stair*, a play about a struggling black family in Chicago, which was later renamed *A Raisin in the Sun*, a line from a Langston Hughes poem. She was the first black playwright and, at 29, the youngest American to win a *New York Critics' Circle* award. The film version of *A Raisin in the Sun* was completed in 1961, starring Sidney Poitier, and received an award at the Cannes Film Festival. She broke her family's tradition of enrolling in Southern black colleges and instead attended the University of Wisconsin in Madison. While at school, she changed her major from painting to writing, and after two years decided to drop out and move to New York City.

Genetic engineering of food and fiber products is inherently unpredictable and dangerous — for humans, for animals, for the environment, and for the future of sustainable and organic agriculture. ① As Dr. Michael Antoniou, a British molecular scientist, points out, gene-splicing has already resulted in the “unexpected production of toxic substances in genetically engineered (GE) bacteria, yeast, plants, and animals.” ② So many people support genetic engineering which can help to stop the fatal diseases. ③ The hazards of GE foods and crops fall basically into three categories: human health hazards, environmental hazards, and socioeconomic hazards. ④ A brief look at the already-proven and likely hazards of GE products provides a convincing argument for why we need a global moratorium on all GE foods and crops.

A local Lopburi inn owner, Yongyuth, held the first buffet for the local monkeys in 1989, and the festival now draws thousands of tourists every year. The Lopburi people revere the monkeys so much that every year they hold an extravagant feast for them in the ruins of an old Khmer temple. Over 3,000 monkeys attend the banquet of fruit, vegetables and sticky rice, which is laid out on long tables. Before the banquet, Lopburi locals perform songs, speeches and monkey dances in honour of the monkeys. The Lopburi people believe that monkeys descend from Hanuman's monkey army, who, according to legend, saved the wife of Lord Ram from a demon. Since then, monkeys have been thought to bring good luck and are allowed to roam where they please in the city, even if they do cause chaos and tend to mug people.
