※ 빈칸에 들어갈 가장 알맞은 표현을 고르시오. (60-62)

60. Alice wandered aimlessly for hours, \_\_\_\_\_ down Joline's address.

- ① forget to write
- ② forgotten to write
- ③ were forgetting to write
- ④ being forgotten to write
- ⑤ having forgotten to write

68. 다음 글의 주제로 가장 알맞은 것을 고르시오.

There are some libraries around you. Now, imagine a library with millions of books—a place where anyone can bring in materials and place them on any shelf or even toss them randomly on the floor. That’s something like the way information piles up on the Internet. The Internet, also called the information superhighway, gives you access to millions of pages of text, animation, audio clips, video clips, and more. However, sources of information on the Internet range from the reliable to the suspicious. This fact underscores the need for critical thinking about every aspect of the Internet.

- ① Lack of e-books on the Internet
- ② Easy access to information on the Internet
- ③ Development of the information superhighway
- ④ Need for critical thinking on online information
- ⑤ A variety of materials on the Internet

Until the early 1900s, the only way to travel in Alaska during winter was by dogsled. The Iditarod honors a famous dogsled trip that happened in 1925. That winter, many people in Alaska became ill. Dogsled teams rushed medicine across 700 miles to save the people's lives. The trail they rushed across is used for the Iditarod. This race is a way of keeping Alaska's history alive.

- ① Travelers in Alaska
- ② Alaska's Long History
- ③ Origin of the Iditarod
- ④ Winter Sports in Alaska
- ⑤ Famous Dogs in Alaska

70. 다음 글의 제목으로 가장 알맞은 것을 고르시오.

Perhaps the greatest influence that Protestantism has had on American life comes from its philosophy regarding a person's relationship to work. This philosophy—commonly called the Protestant work ethic—stresses the moral value of work, self-discipline, and personal responsibility. According to this ethic, people prove their worth to themselves and to God by working hard, being honest and thrifty, and avoiding luxury, excessive pleasure, and waste. The accumulation of wealth is not considered evil unless it leads to a life of idleness and sin. The Protestant work ethic has much in common with capitalism and with the American emphasis on financial success, practicality, efficiency, and self-sufficiency.

- ① Protestantism and Ecology
- ② Churchgoers and Their Responsibility
- ③ American Moral Crisis
- ④ American Capitalism
- ⑤ Protestant Work Ethic

Originally from Switzerland, the Amish (about 40,000 people) are now centered in the U.S. and Canada. Within the U.S., they have developed farming communities in 23 states, mostly in Pennsylvania and the Midwestern states of Ohio, Indiana, Iowa, and Illinois. The Amish are easy to spot. Their clothing is old-fashioned and plain. The men have beards and wear wide-brimmed hats, and the women wear long dresses and bonnets. Jewelry and buttons are not allowed. The Amish travel in horse-drawn wagons because their religion forbids them to use cars. They have no telephones or electricity in their homes. Amish children are educated through eighth grade only and are trained to be farmers.

71. 윗글의 어조로 가장 적절한 것을 고르시오.

- ① provocative                      ② objective  
③ encouraging                    ④ affectionate  
⑤ complaining

72. 밑글의 내용과 가장 부합하는 것을 고르시오.

- ① Most Amish people go to college.
- ② The Amish live in agricultural communities.
- ③ The Amish women wear wide-brimmed hats.
- ④ The Amish enjoy wearing gold rings and earrings.
- ⑤ The Amish have farming communities in every U.S. state.

73. 다음 글을 읽고 밑줄 친 This book에 대한 설명으로 가장 알맞은 것을 고르시오.

This book, published in 1929, is oblique rather than polemical in its arguments. Based on speeches written for delivery at the British women’s colleges of Girton and Newnham, it surpasses any feminist writing since Mary Wollstonecraft for artistry and profundity of emotion. Through her flexible and evocative use of language, the author conveys the longing, frustrating and disabling rages that are experienced by every woman and by the female creative writer especially. She looks ahead to a time when Shakespeare’s sister might “find it possible to live and write her poetry.”

- ① a collection of political speeches
- ② an inquiry into language use
- ③ a writing on feminist thoughts
- ④ a women’s college bulletin
- ⑤ a collection of Shakespearean criticism

More than one billion people on our planet live in crushing poverty. That’s more than three times the population of the United States. The world’s poorest billion drink dirty water that makes them sick. They die from diseases that are easily prevented in wealthier nations. For example, in the U.S. there are fewer than 100 reported cases of measles. In poor countries, however, thirty million people are infected, and half a million children die each year from this preventable disease. Common diarrhea is always unpleasant but rarely dangerous in the U.S. In countries that lack clean water and basic medicine, however, diarrhea kills one million kids each year.

74. How many children die from measles and diarrhea annually in poor countries?

- ① three hundred thousand
- ② five hundred thousand
- ③ one and a half million
- ④ three million
- ⑤ thirty million

75. Which of the following is NOT true?

- ① The U.S. population is about 300 million.
- ② Measles is not reported these days in the U.S.
- ③ In poor countries, half a million kids die from measles annually.
- ④ Poverty plagues a lot of people on our planet.
- ⑤ Common diarrhea is not dangerous in the U.S.

All told, governments and scientific organizations around the world have built more than sixty-five underwater habitats. But the oceans need more help. During the last century many fish populations declined by ninety percent, and virtually all marine habitats near human settlements were degraded in some way. Along with other technologies, and information from the ocean animals themselves, the underwater lab has helped show us what the oceans were meant to be like. By allowing us to live with the fish, Aquarius has opened a new window on the watery seventy percent of our planet. The spaceship on the ocean floor has become one of the ocean’s best defenses.

About what percent of our planet is land?

- ① 30      ② 65      ③ 70      ④ 75      ⑤ 90

Lots of scientists are now trying to help keep people safe. Researchers are developing ways to detect this activity using satellites, sound sensors, and very sensitive gas sniffers. In 1991 scientists took the pulse of Mount Pinatubo in the Philippines and correctly predicted that it was about to erupt.

- ① hurricane
- ② tornado
- ③ blizzard
- ④ volcano
- ⑤ deluge

79. 다음 글을 읽고 밑줄 친 문장과 의미가 가장 가까운 것을 고르시오.

Modern history begins when history becomes concerned with the future as well as the past. Modern man peers eagerly back into the twilight out of which he has come, in the hope that its faint beams will illuminate the obscurity into which he is going; conversely, his aspirations and anxieties about the path which lies before him sharpen his insight into what lies behind. No consciousness of the future, no history. Between past and future, action and interaction are constant. Past, present, and future are woven together in an endless chain.

- ① History is unconscious of the future.
- ② History is disconnected from the future.
- ③ Future historians must have a conscience.
- ④ The future requires historical consciousness.
- ⑤ History presupposes the consciousness of the future.
