1. The streets outside are swarming with pickpockets.

You couldn't care less about it
You'll soon get the feel of it
You can't be too careful
I hope you have no hard feelings about it

2. Provide essential labor in richer countries with low birthrates, while flee to adjacent or distant foreign countries to escape harsh political or environmental conditions in their own.

Unpaid laborers - expatriates
Migrant workers - refugees
Domestic workers - immigrants
Foreign laborers - innovators

3. The population of Easter Island is now around 5,000, nearly double what it was twenty years ago.

as than that

4. Regulations related with the life or safety or those aiming at technological and industrial development, such as energy efficiency rating of buildings, should be maintained. However, irrational regulations free competition and creativity of businesses should be overhauled.

hampering embroidering
embracing manifesting

5. We seem to take it for granted that we have a society that can still manage to identify and tackle new problems, despite the current inability to allow for new ideas and concepts.

perplexed displayed
relieved granted

6. The name England is derived from the Angles, one of the Germanic tribes which established monarichies in lowland Britain in the 5th century, after the final withdrawal of the Romans in 409.

collapse invasion
surrender retreat

ecculatory exhortative
exemplary exasperating

7. Some of these books were, on the face of it, frivolous and facetious: but many, on the other hand, were serious and prophetic, moral and hortatory.

discard digress
denounce deny

8. The distinguished businesswoman finds herself unable to jettison her lower-middle-class prejudices.

discard digress
denounce deny

9. Nutritionists recommended that everyone eat from three to five servings of vegetables a day.

Their human rights record remained among the worst, with other abuses taking place in the country.

It has been widely known that he is more receptive to new ideas than any other men.
He proposed creating a space where musicians would be able to practice for free.

10. No amateur can participate in the contest except that he is recommended by a previous prize winner.

There go the last piece of cake and the last spoonful of ice cream.
Such was the country's solutions that they drew international attention to the issue.
I wish I had studied biology when I was a college student.

11. In the evening he came and played the violin a long time, as usual. He was talkative, by nature, and perhaps he loved his violin because while playing he did not have to speak.

talkative affectionate
intolerant taciturn
12. How different it was 50 years ago when, on May 1, 1963, James Whittaker, accompanied only by Sherpa Nawang Gombu, became the first American to reach the summit of the world. Whittaker did it by climbing the Southeast Ridge, the same route pioneered in 1953 by the peerless New Zealander Edmund Hillary and Sherpa Tensing Norgay. Whittaker had climbed Mount McKinley a few years before, and it was Gombu’s third trip to Everest.

Three weeks after Whittaker and Gombu’s ascent, in an unprecedented act of boldness, teammates Tom Hornbein and Willi Unsoeld clawed their way up a completely new route, the West Ridge.

13. Why is it that some people reach a ripe old age and others do not? Several factors influencing longevity are set at birth, but surprisingly, many others are elements that can be changed.

Why do indoor cats have more kittens than outdoor cats? There are several possible explanations for this phenomenon. One possibility is that indoor cats have less competition for resources than outdoor cats. Another possibility is that indoor cats are better protected from predators, giving them a higher chance of survival. Additionally, indoor cats may have more access to food and shelter, which can lead to larger litter sizes. In conclusion, there is evidence to support the idea that indoor cats have more kittens than outdoor cats due to differences in resource availability, protection from predators, and access to food and shelter.

14. What if you were to find yourself in a situation where you had to make a difficult decision between what you wanted and what was best for others? Would you prioritize your needs or those of others? Is there a way to find a compromise that satisfies both?

15. How does the process of specialization affect the development of new technologies? What are some examples of technologies that have emerged as a result of specialization?

16. How do different species adapt to their environments? Can you provide examples of adaptations seen in various species?

17. What are some ways in which specialization can lead to advantages or disadvantages for individuals or populations?

18. How does the process of specialization affect the development of new technologies? What are some examples of technologies that have emerged as a result of specialization?

19. How does the process of specialization affect the development of new technologies? What are some examples of technologies that have emerged as a result of specialization?

20. How does the process of specialization affect the development of new technologies? What are some examples of technologies that have emerged as a result of specialization?
